

## My semester in Czech Republic

Having the opportunity to study one semester out of your home university is a big experience where you get the chance to learn so many things and grow in so many aspects. My personal experience in Czech Republic was great because I could live a lot of things that made me a better person

and an even better professional. Getting to know so many people, learning so many things, knowing how the education in a country that is very far away from your home works is a very nice way of opening your mind and understanding how many possibilities you can achieve in life.

The Czech Republic is a beautiful country. I had so many good opportunities while I was here, and I am very thankful to the University of Hradec Králové for making my stay here even better. Everyone was very nice and willing to help in every aspect, and even before I traveled I could feel how kind the attention was. I am grateful also for what I learned and the teachers I had, and for my classmates and the activities we could do together.

I would definitely recommend anyone this experience in the Czech Republic because for me it was wonderful and it is the best way to learn and to open to what the world can offer you and to get to know what you can offer to the world. Now that I have to return to Colombia I have a different view of things and life.

I know this will make me do things in a better way in order to serve my country and give my best to help as much as I can and return all the good things I have received. Once again, I am grateful for everything since day one, and I am really hoping life can give me so much more opportunities to return to Czech Republic, a place I could truly call home.
