

The best 5 months ever!

My name is Ana Lucrecia Medina Arostegui, I arrived on 5th February in this calm and beautiful city of Czech Republic, the beginning was a little difficult because my friends and I have the experience to get lost knowing the city but this difficult was really funny and unique because almost in my case I feel like a new person who developed a new ability.

The first month was the most difficult here, at the beginning, I was in a completely strange place with people that just speak Czech and where I did not know how to move in, fortunately in the first week a boy explain us how use the transport system and a student from the international office show us the main places we must know, so after this the rest of the stay here was awesome! The principal objective to be here, the classes, weren't a preoccupation because the teachers here were so nice and the component of all this subject, a thing we enjoy to receive, the teaching program included travels, materials and dynamic all times due of that is easy to imagine we can easily learn and know about new things.

Apart of the studies here, the university give us enough time to learn and know this beauty and new culture, the European culture, and this is one of my favorite things about this exchange. Due the class are so easy and the system of learning so nice you can have time to know new places, traditions and why not? New countries in this continent; when we arrived here the university give us facilities to obtain the Czech visa to be here so that fact you can use to know all this beauty country has and don't worry about all the steps to get all documents, fortunately almost in my case I have a really nice coordinator, Věra, who was a great helpful person in this mobility for me, she always was patient to

My Student Exchange Experience

Ana Lucrecia Medina Arostegui, Nicaragua

explain us all steps we have to follow to make all the things, I know I just mentioned little aspect about my Erasmus life here but I think all of this was the most important.

Thanks to Erasmus to give me this opportunity to improve my knowledge and in all aspects in this 5 months!
