

I have heard a lot about the fame of Czech educational system and became interested in the features of it. This is when one of my lecturers told me there was a program in Sociology in Czech Republic and if I succeeded I could go to the university and do the course in Hradec Králové University.

Finally, I had the opportunity to study here. I am amazed at the nature, Czech culture and the professionalism of Czech faculty at the University of Hradec Králové. Of course, I had some difficulties, but I overcame them easily soon. I especially value the interactivity of the courses. This is vital for my specialization. Another point that I liked a lot was the number of students in a class. I was in a class with few students and this makes the classes more interactive, easy-going and productive.

I received profound knowledge in my profession. The university gave me the opportunity to make a speech about Armenian culture, some Armenian traditions and problems that the country is facing. I am fascinated by the beauty of nature that is so splendid, especially in spring. I am going to miss the minutes of happiness and even unhappiness here. I am going to miss all about Hradec Králové.

I am thankful for all the lecturers in the University Experiences and events that I took part in.

I am thankful for the entire faculty in the university for the good atmosphere and the knowledge that I received.

Thank you very much. You did a lot to me and I really appreciated it!
