

My relaxed and active life in UHK.

My roommates were very sweet in Palachova! We had a really nice time to live with each other. Sometimes we took a small international dinner by ourselves from Brazil, Nicaragua, and Korea. We shared our different cultures like food, and talked about politics, economy, and social life, etc. We cannot forget the whole memory in our room.

Sometimes, when I have free time after school, I usually played basketball with my friends from France and Turkey or others. It made me healthier than before. After playing basketball, sometimes I would drink a Czech beer and it would be really chilling out for me. In addition, when I have free time in weekend, I went to climbing center near by dormitory. I brought climbing shoes from Korea and that is why I could climb better. I was used to go for a walk through Elbe River. It healed my mind by relaxing. Moreover, there were a lot of ducks and swans.
