

Time flies, and the five months are over. All the things that have happened here are far more than my expectations

### Philosophical Faculty

*(The building of Philosophical Faculty is beautiful.)*

First of all, I want to share my faculty, Philosophical Faculty, I really like it, I have met many students from all over the world, and I have studied several great courses. During the course of the class, the teacher always encouraged us to express our opinions and discuss different social, political and philosophical issues with

the students. In the process of communicating with the students from different countries, I stimulated my old ideas and obtained more ways of thinking.

I have participated in many great school events, such as a welcome party, trip to Prague, country presentations, hosted by BS, and ski trip by the Philosophy Faculty, etc. I always get many new experiences during the event, also made many friends from different faculties.

## Dormitory

Living in Palachova is the best experience since my college! I have five very perfect and friendly roommates, we share our daily life, care for each other.

Because all exchange students live together, we often go to each other's flats to cook, chat, and watch movies.

*(Cooking and eating with Korean girls)*

## Trip

During the five-month period, I used my spare time to travel to many places. The best thing in traveling in Europe is the student discount, because we have the identity of European students, so there are several discounts even free on trains, buses, museums and art galleries, etc.
