### My experience in Hradec Králové, University of Hradec Králové

Everything started 5 months ago. February 2018, during winter in the Czech Republic. I have to admit that everyone told me about the really cold weather, but I never thought that it would be like that.

Despite the really cold weather during the first months, I was able to forget about it thanks to the good experience and the really nice people that I got to know.

This experience would not have been the same if it wasn't for the people that I met during these months, people from all the continents, countries, cities and cultures. It is like have a mini representation of the entire world in one place, Palachova, which was our home for these few months.

This time living in another country made me realize and be aware that all countries have different costumes and ways to relate to each other and that we have to be respectful about that in the same way they have to be respectful to us considering that we are not from here and we have different ways to relate with people.

I will always have this experience in my heart and I will always recommend to study abroad because you learn to appreciate everything that you have and you are. It also makes you grateful of the people who live the experience with you because in the end, they somehow become part of your family.
