

University of Nairobi

My trip to Czech Republic has been nothing short of a success. My life in this great country kicked off on a higher note when I first arrived at the airport and met strangers who I will later call my friends and family. I was mesmerized by the level of technology and infrastructure that existed in the country having come from a country which is developing.

One of my principles in life has always been to take advantage of all the opportunities that come my way in a bid to gain experience and expand my personal network. Studying at UHK has been a great learning experience for me as I have had the opportunity to study under a different curriculum and program all together. My life at UHK has been outstanding as I have been able to gain new abilities such as presentation skills and to interact with the lecturers on a level like never before.

UHK is really special to me as through it I have been able to interact with my fellow colleagues from all over the world and gain knowledge about different cultures and not to forget the various local dishes that I have tried as well.

As the saying goes, all work without play makes jack a dull boy and really there is no day I have ever been bored during my stay in Hradec Králové. Having arrived during winter, a lot of fun activities were limited but nevertheless I got to experience one of the most popular winter activity, Skiing. Just like every new thing, it was difficult at the start but at the end of the day I was able to get a nickname from my friends and that is the “skiing Kenyan champion “

I am grateful to my home university for according me with this opportunity and to UHK for the wonderful experience and I will definitely recommend it to my friends. This goes on without mentioning the tireless efforts by our coordinators which have made me to feel at home even though I am miles away from home.
