

MY STUDENT EXCHANGE EXPERIENCE

JUNG-FANG CHANG, TAIWAN

*"My time in
the UHK"*

Before coming to the Czech Republic, I heard the suggestions from other exchange students who told me I had to go to an ice hockey game.

On the way to the stadium, I saw people wearing hockey clothes representing Hradec Králové and a representative scarf around their necks. From this, we can see that people in towns and cities attribute great importance to hockey and they are very attracted to it. I was proud to cheer on the players from time to time during the game, especially at the moment of scoring; everyone picked up their scarves and waved in the air to express the excitement of their hearts. It is rare to see such an atmosphere in Taiwan.

The stadium seats were all sold out, and some people bought tickets to watch the game standing. This is a highly regarded sport in the country, and it seems that people feel very happy about it. While players were fighting to grab the ball, there were so many collisions, but they never showed pain, and they were still desperately fighting for the glory of the team. Undoubtedly, this game was one of the things that impressed me the most during the exchange, especially the spectacular scene of the whole audience cheering.
