

# MY STUDENT EXCHANGE EXPERIENCE

CHEUNG TSZ YING

HONG KONG

SUMMER TERM 2021-2022

This is both my first time in the Czech Republic and my first time studying abroad for almost 6 months. Before I came here, I was so excited to explore this country, which is a mix of central Bohemia and Modern styles. Here, I study in Hradec Králové, a charming city with bohemian-style architecture... And I love it so much.

During this exchange period, I met a lot of friends from all around the world. They told me a lot about their home countries, for example, the cultural differences between Asian and Latin Americans. We also had a lot of gatherings to know each other. This experience is precious because it is not easy to find a bunch of people with different backgrounds in the same place to share their opinion.

On the other hand, I learned a lot by studying at the UHK. They provided a huge number of courses for students to choose from. So I have chosen some courses that I had never studied before. Although it was quite challenging for me, compared to the students with some background knowledge on particular topics, it broadened my horizons. Also, the professors here encourage us to express our opinion on different issues. Now, I'm able to understand more about the world through first-hand information from students in my classes, which is something I cherish because absorbing knowledge doesn't only rely on books but also on discussions. This is a once-in-a-lifetime experience. Definitely, studying at the UHK is memorable.
