ERASMUS STORY.

Josue Rivera Encinas

I think it was a complete experience. The Erasmus Mobility program gave me the chance to experience many unforgettable moments, learning lessons, personal development and, of course, professional development.

Once I was selected to do the exchange, I had to carry out the required procedures and, with it, the visa process for my stay in the Czech Republic. Time passed and finally the expected moment arrived, the flight had layovers, which was good for me. The journey was long, but after all I arrived at Prague Airport where a colleague (Maclean) picked me up and took me to my room, thanks to the initiative of the ESN boys.

The process of getting used to it took place in the first weeks, little by little I became familiar with many things, meeting my new roommates of different nationalities, and later my classmates.

Once in class, the teachers shared the subjects from the perspectives of their context and environment, just as my classmates and I were able to transmit our own experiences in contrast from one country to another. All this together with some activities that were taking place throughout the period. In the meantime, I took the opportunity to get to know the Czech Republic a little more by visiting some nearby cities in the north and south.

At the time of the examination stage, I was able to complete and pass the subjects that I had taken at the beginning of the period, this meant having fulfilled a vital and certainly mandatory responsibility regarding the stay.

On the eve of my return to Bolivia, I undertook a last trip to Italy, being a pleasant experience that I carry with me.

Surely everything lived will return to pleasant memories, finally, I am grateful for the opportunity to have been part of this adventure in the Erasmus Mobility Program.
