

Erasmus+ Exchange semester in University of Hradec Kralove

Erasmus+ exchange semester was an experience of meeting lot of new people and studying with wise and experienced teaching staff. In Hradec Kralove everything is accessible by foot if you are into walking, also public transport system works great. Study materials that are used for the classes allows students to deepen their knowledge of the subjects they are into. All the teaching staff are very approachable and can help with all the things that are not clear for the student. International support staff is amazing, they respond quickly and helps with everything. It was great that UHK is thinking about the quality of studies and provide international professors to make and lead the classes and seminars, it gave much more depth to the study process. The study process was interactive and indulging to overcome ones limits.

Hradec Kralove as a city is quite small and quiet, and the most magical part of the city is the nature surrounding it and the old town. For outdoor lovers the woods by the dormitory are well taken care off and all is made with paths for roller-skating, running and riding a bike. City itself has a good bike rental system, and trains and busses can take to the nearby or further cities with ease. In the city it is easy to navigate and find all what one needs. Museums, cafes, and old-town charm will sit in my heart and share memories of Erasmus exchange.

This is great town for studies and to have an outdoor activity full weekends. Place to make new friendships and have them for the rest of one's life. The experience of this Erasmus+ exchange semester will not be forgotten with all the organized activities from UHK side and ESN community.
