

# MY STUDENT EXCHANGE EXPERIENCE

LEUNG HEI TUNG ARTEMIS

HONG KONG

SUMMER TERM 2021-2022

This exchange experience at the University of Hradec Králové has broadened my horizon a lot and I must say that it will be unforgettable. I am happy to have made friends from all over the world. We shared our food and languages of our own countries, and it is wonderful to have experienced so many different cultures in one place.

This was my first time leaving home for a few months and also my first time visiting Europe, so everything was new to me and this made me pretty excited. One of the most impressive things for me was to see snow and ski for the first time since back in Hong Kong we only have warm winter.

The Czech Republic is located in the center of Europe so it was very convenient for me to travel to different countries. All of them are beautiful and I am really in love with Europe after this.

My study here was fruitful thanks to all the friendly professors of the university. Since I am studying Visual Arts at my home university, I am glad that I got to have the valuable opportunity to take courses about European culture that covered topics such as arts and architecture, which expanded my knowledge in my field of study.

In general, I enjoyed my stay a lot and it was definitely one of the best periods of my life. I am very grateful to have a chance to study here.
