

# MY STUDENT EXCHANGE EXPERIENCE

LINEEKELA SHIPIKI

NAMIBIA

SUMMER TERM 2021-2022

When I got the opportunity to be accepted for the Erasmus exchange, I busted into tears, I spent days imagining all the adventures and discoveries that I would meet on the other side, and guess what? My imaginations and dreams came out to be true. Erasmus did not only enable me to experience a variety of courses but a new way of learning full of discussions and communication, and approaches. Secondly, through Erasmus, I got to meet different people from all corners of the world, and I made friends with them, I got to learn about their culture, their way of living, their behaviours, and their approaches and opinions on different topics. Moreover, I got to travel on my own for the first time, I was independent and did not rely on someone doing the work for me.

In addition, I got an opportunity to solve my problems. I got to taste different food, spices, and drinks and got new cooking skills as part of my hobby. The exchange program exposed me to one of the best ways of education. The way my professors taught me was extraordinary and unique. For the first time, I got to understand that my opinions mattered, and they made sense when I defended them.

I got to boost my confidence in front of the lecturers when defending my concepts. Furthermore, I was one lazy bug when it came to reading articles for the next lessons or assignments but what happened was that it was useless going to class without learning anything because that was what the discussions were about in the seminar classrooms.

These classrooms did not only introduce me to a discussion sphere but also to debates where you had to win your arguments. Overall, my education experience was very easy and fun, which led me to approve with flying colours.

Furthermore, with my student visa, I got to travel to other countries in Europe. I travelled to Austria in Vienna, and it was a wonderful experience. I visited some famous palaces with historical stories about queens and kings and also aquariums. I tried to find myself a job and luckily enough I found myself a job that really paid well and earned some cash. If I would recommend my fellow students to take part in the Erasmus program, the Czech Republic is one country you would love to apply to. Besides, this mobility will not only enhance your educational experience and advantage when you look for a job at home, but it allows you to create a connection worldwide.
