

MY STUDENT EXCHANGE EXPERIENCE

MARÍA RODRÍGUEZ ARÉVALO

SPAIN, REY JUAN CARLOS UNIVERSITY

WINTER AND SUMMER TERM 2020-2021

First of all, this has been one of the best years of my life. During these nine months, I have been able to develop into the person I want to become in the future, and it has definitely made me more mature. I have discovered parts of myself that I wouldn't have known if I hadn't gotten out of the comfort zone I have in Spain. I have met people that I am sure I can call my friends for the rest of my life because, more than friends, we have become a family. Moreover, it is amazing how many international people we have met during this year. We have been able to learn about so many cultures, costumes, food, music, languages..., and this, of course, has made everyone more tolerant.

The university experience, regarding my courses, has been different than in Spain and I would like to say that even better. In my country, I am used to a different education in which the most important part is about memorizing, but here I have been able to participate more in the classes which have been more dynamic (because while we were a maximum of 10 students, in Spain, I am in a class with 100 students).

I am never going to forget all the experiences that I have lived here, how much love I have felt here, and for sure my development as a person. I am not coming back to Spain being the same person, and it is for the better.
