MY EXCHANGE EXPERIENCE

Those five months I spent as an exchange student at UHK were amazing, the most important experience in my life.

I have dreamt about doing an exchange since I was little, so I was really happy that it would finally come true. The moment I got to the Czech Republic everything was scary, a different country, with a different culture, a language that I didn't speak... But after some days, it all became familiar, and I started calling this place my house, and Palachova was my home.

An important fact for me was all the friends I made here, connecting with people from all over the world, such special people, that became my family here and are friends I will never forget and take with me for the rest of my life.

About studying, it was also a different experience. Studying in a different field from my degree, having international classmates with different experiences was great, sharing information and life experiences and points of view was very enlightening for me.

I will be forever grateful to Hradec Králové, to UHK, to this place that received me and made me feel like home.
