

MY STUDENT EXCHANGE EXPERIENCE

OLENA MARIUKHNYCH

UKRAINE

WINTER SEMESTER 2021-2022

The experience of studying abroad is an invaluable thing in the life of every student. These are the thoughts I have always held and later convinced myself of this in my own experience by having the opportunity of studying at the University of Hradec Králové.

My involvement with this university began with the fact that I took part in an online program where I had the opportunity to study remotely. Later, when I learned about the opportunity to come here and see everything with my own eyes, I just immediately sent my documents and started preparing the paperwork for a visa. Surprisingly, the visa preparation process was quite simple, thanks to the constant consultations and support of the foreign coordinator.

Having received a visa and prepared everything I needed, I went on one of the best adventures of my life. Thanks to the support of the ESN youth association and a personally selected «buddy», my arrival seemed easy and did not cause any difficulties. And then began the story of meeting new people, impressions, and the new world in general. I was pleasantly surprised that a number of various adaptation events were held, such as parties, city tours, and picnics. Thanks to the opportunity of choosing the courses you need, I gained invaluable knowledge from various fields of Political Science, as well as improved my knowledge of English and Czech.

Thus, from my own experience, I can say that I took the opportunity to participate in this exchange program for students who gained knowledge in various fields of science, improved their foreign language skills, visited many new places, and learned more about cultural diversity in the Czech Republic. Moreover, I significantly expanded the circle of communication and went through unforgettable emotions and impressions for life.

Participating in this mobility gave me the opportunity not only to gain invaluable knowledge and practical skills but also to discover a new world where you can, in a short time, get to know different parts of the world, learn more about people's traditions and culture and share your own.

Also, special attention should be paid to the organization of the educational process, which allows students to easily plan a study schedule and have the opportunity to travel in their spare time. Thus, I have already managed to visit the most prominent Czech Republic and later discover new European countries.
