

## Final feedback Erasmus+

My Erasmus+ staying in Hradec Kralove was amazing experience that I will always remember as my one of the most influential in my live. From the beginning, the university made me feel welcome and took well care of me. The staff and coordinators I have met were very supportive and they were always ready to help me with every problem I have encountered during my staying here. Everything was explained clearly and if something happened, I could simply ask, so there was no problem or unclear situations. Whole getting in the University experience was very smooth, which was very surprising for me, but in a good way.

Studying here was also a great experience thanks to excellent teachers. The classes were interesting, interactive, and taught in a professional but also friendly atmosphere all the time. I will remember especially Czech Language and Historical and Political Development of China as my favourite. I really appreciated how approachable and helpful the lecturers were during the whole semester. Exams were fair, not to hard, not to easy, but overall there was no great stress about my studying here from my side. English level during the classes was approachable, so there was no problem with understanding even more complicated topics like during the Political Parties and elections class. I really enjoyed classes here, so I was participating in all of them, and were so unhappy when I couldn't participate due to having fever. My study plan was also great. I studied only twice a week, so I had a lot of time for sightseeing and to explore every corner of the Czech Republic.

Another big advantage was the modern dormitory, which was very comfortable, clean, and equipped. It made everyday life much easier and helped me quickly feel at home in a new country. We had everything we needed to enjoy our lives here. Also staff working in Palachova dormitory was very friendly, and even the language barrier wasn't a problem at all, and we could manage to get everything we needed. Cleaning ladies were constantly checking our room, but they were really friendly, and they wanted the best for us, so they even gave us recommendations about how to clean accommodation properly, which I personally really appreciate.

Besides studying, I met many wonderful people from different cultures and created unforgettable memories here and I think people here are the best part. I could never imagine, that I would meet so many friends from other countries, and that we could have so much in common. Hradec Kralove is a beautiful and peaceful city with great atmosphere for students. Some people are saying, it's too small to enjoy in for the Erasmus+, but I don't agree with that at all. I think the city is perfect with its size, and the prices here are very okay, compared to the bigger cities, which makes it perfect place to stay. There is a lot green places, culture aspects and connection to other cities in Czechia. Also local Erasmus Student Network did everything to keep us busy with lot of activities and fun events. Buddies also tried their best to help as much as possible for us to fit in into Czech life.

My Erasmus+ experience here helped me to grow personally, and to improve my language skills(not only English, but also others), and to become more open for other cultures. Having opportunity to get in touch with someone from different continent doesn't happen every day, and I'm really grateful for this opportunity. I really recommend this and whole Erasmus program as something, that everyone should experience at least once. Definitely one of my best choices in my life. I'm really happy and grateful to have a chance to participate in the program, and I'm really thankful for everyone, who make this possible for me.
