

HRADEC KRÁLOVÉ ERASMUS EXPERIENCE

At the beginning we were not expecting much because it was a small town that we never heard about, but overall, Hradec Králové has been really positive and enriching, both academically and personally.

Compared to other places of destination, here from the very beginning, the host university showed a strong commitment to supporting international students, which made the process of LA more easy to do.

Moreover, the university offered many facilities and information regarding not only courses, schedules, and assessment methods but also the ESN program organized many student activities to do in the city and get to know more people.

We also were surprised by the many people of different countries that we met here, even though it is not a very common Erasmus destination.

One of the most important aspects of my experience was the support provided by the Erasmus coordinator Iva. She helped us in all the administrative procedures, convalidations with the classes and every question or things we needed.

Beyond the academic setting, Hradec Králové is a good city for an Erasmus. It is a welcoming and well-connected city to other places, that make it easy to travel around Europe.

In conclusion, our Erasmus stay in Hradec Králové was enriching in many aspects. You just have to say yes to every plan, be open to meet many people, travel and experience many activities out of your comfort zone.
