

Erasmus Students Final Feedback

Participating in the Erasmus+ program at the University of Hradec Králové in Czechia has been one of the most valuable experiences of our academic journey. The program provided us the opportunity to study in an international environment, meet people from different cultural backgrounds, and improve both our academic and personal skills.

Academically, we had the chance to explore topics related to European politics, international relations and regional cooperation from different perspectives. The courses and discussions helped us broaden our understanding of European affairs and strengthened our analytical thinking skills.

Beyond academics, living abroad significantly improved our independence, adaptability, confidence and intercultural communication skills. Interacting with students from various countries allowed us to develop a more open-minded and global perspective. We also improved our English communication skills through everyday interactions and academic activities.

One of the most rewarding aspects of the Erasmus experience was the opportunity to build international friendships and gain firsthand experience of European culture and society. These experiences have increased our confidence and motivated us to pursue future international academic and professional opportunities.

Overall, we are very grateful for the Erasmus+ program and the support provided by both my home and host universities. We would highly recommend this experience to other students, as it contributes not only to academic development but also to personal growth and international awareness.
