

Doctoral Study Programme Biology and Ecology – Supervisors and Research Topics – admission procedure for the academic year 2026-2027

doc. Mgr. Petr Bogusch, Ph.D.

Research specialization: Ecology and conservation biology of pollinators

doc. Ing. Jakub Horák, Ph.D.

Research specialization: Advanced spatial statistics

RNDr. Zuzana Kovalíková, Ph.D.

Research specialization: Plant ecophysiology, water stress, plant hormones in plant defense reactions

doc. RNDr. František Malíř, Ph.D.

Research specialization: Influence of nephrotoxic mycotoxins on diseases of the urinary system

RNDr. Alena Myslivcová Fučíková, Ph.D.

Research specialization: Analytical and omic approaches in the fields of biosafety, proteomics and applied molecular analysis

prof. RNDr. Karel Šilhán, Ph.D.

Research specialization: Physical geography, geomorphology and dendrogeomorphology

doc. Ing. Jiří Tůma, CSc.

Research specialization: Plant Stress Physiology
