

Accessing the Wi-Fi Account Portal via the Web SSL-VPN Portal

This guide describes how to access the Wi-Fi account portal at:

<https://wifi.uhk.cz/>

The portal is used to create a secondary Wi-Fi account for connecting to the Eduroam network.

The portal <https://wifi.uhk.cz/> is available only from the internal UHK network. If you are not connected to the UHK network, you can access it via the University of Hradec Králové web SSL-VPN portal.

1. Open the VPN Portal

Open the following address in your web browser:

<https://vpn.uhk.cz>

The **SSL-VPN Portal** login page will be displayed.

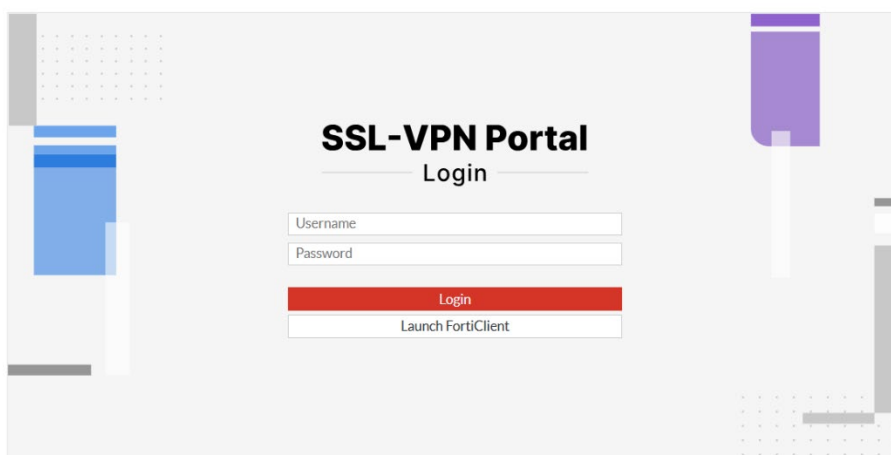

Figure 1 – SSL-VPN Portal login page

2. Log in to the VPN Portal

On the login page, enter:

- **Username** – your UHK username
- **Password** – your password

Then click **Login**.

After a successful login, the main page of the web VPN portal will be displayed.

3. Open wifi.uhk.cz Using Quick Connection

On the main page of the VPN portal, find the **Quick Connection** section.

Figure 2 – Main VPN portal page after login

In the **Quick Connection** section, proceed as follows:

1. Leave **HTTP/HTTPS** selected in the drop-down menu.
2. Enter the following address into the address field:

<https://wifi.uhk.cz/>

3. Click **Launch now**.

After clicking the button, the Wi-Fi account portal will open through the web SSL-VPN portal.

4. Create a Wi-Fi Account for Eduroam

After opening <https://wifi.uhk.cz/>, you must log in using your standard UHK login credentials.

Logging in to the VPN portal only provides secure access to the internal Wi-Fi account portal address. It does not automatically log you in to the Wi-Fi account portal itself.

After logging in to the portal, you can create a secondary Wi-Fi account for connecting to the Eduroam network.

The Eduroam username has the following format:

wifi-login@uhk.cz

The password for connecting to Eduroam is the password generated in the portal at <https://wifi.uhk.cz/>.

5. Connect to the Eduroam Network

After creating the Wi-Fi account, connect to the **Eduroam** network.

Use the newly created login details:

- **Username:** wifi-login@uhk.cz
- **Password:** the password generated in the portal at <https://wifi.uhk.cz/>

Your original standard UHK login credentials may no longer be valid for connecting to the Eduroam network.

6. Finishing Your Work

After creating the Wi-Fi account, we recommend that you:

1. log out of the portal at <https://wifi.uhk.cz/>,
2. log out of the VPN portal,
3. close the browser window.

7. Troubleshooting

If the portal <https://wifi.uhk.cz/> does not open or does not work correctly:

- check that the address is entered exactly as <https://wifi.uhk.cz/>,
- make sure you are logged in to the VPN portal,
- leave **HTTP/HTTPS** selected in the **Quick Connection** section,
- try opening the page in another web browser,
- alternatively, log out of the VPN portal and log in again.

The portal <https://wifi.uhk.cz/> can also be accessed from computers in university classrooms or from the internal UHK network.

If the problem persists, please contact IT support.
