

Call for Competition for 2024-2026 Postdoctoral Job Positions at the University of Hradec Králové

The Postdoctoral job positions are offered to enhance existing and develop new research teams at the University of Hradec Králové (hereinafter referred to as the UHK).

This call is announced only for postdoctoral positions at the UHK Faculty of Education.

General conditions of the competition

The applicant must justify the necessity of the position and the relevance to the UHK Faculty of Education. He/she must, among other things, describe the planned research activities during his/her employment at the UHK Faculty of Education and the relation to the research performed by the researcher before.

The applicant must define specific and clear aims and benefits of his/her employment at the UHK Faculty of Education, e.g., establishment of new or expansion of the existing cooperation, development of networking, transfer of knowledge, or transfer of research methods. Benefit of his/her employment for the research of the UHK will always be assessed.

The researcher is obliged to participate actively¹ in one conference/seminar/workshop/online presentation organized by the UHK every 6 months of the employment. If the employment lasts 6 months, he/she must participate in at least one such event. If the employment lasts for more than 6 months and a maximum of 12 months, he/she must participate in at least two such events. If the employment lasts for more than 12 months and a maximum of 18 months, he/she must participate in at least three such events. If the employment

¹ Active participation includes the researcher's contribution in the form of a presentation, poster presentation, or participation in a panel discussion. Researcher's active participation must be conclusively proved.

lasts for more than 18 months and a maximum of 24 months, he/she must participate in at least four such events. If the employment lasts for more than 24 months and a maximum of 30 months, he/she must participate in at least five such events. If the employment lasts for more than 30 months and a maximum of 34 months, he/she must participate in at least six such events.

The postdoctoral researcher will have a supervisor from the UHK Faculty of Education at disposal for consultations for the whole period of his/her employment. A coordinator of UHK Faculty of Education (the faculty coordinator) will be appointed to manage postdoctoral positions at the Faculty of Education of the UHK.

The applicant will work according to the Schedule of his/her research work which he/she will submit together with the application form. It is necessary to specify precisely the verifiable research results that will be achieved (see Annex 1).

The completion of the Schedule of his/her research work will be checked every month by the supervisor; his/her salary will be paid on the basis of the check. The applicant will have to submit activity reports to the faculty coordinator every 3 months; they will be reviewed by the faculty coordinator and the supervisor (see Annex 2). The activity report will also be evaluated by the Evaluation Board every 3 months.

The position of a researcher may bear workload between **0.5** and **1.0**. Postdoctoral teams with a total workload of not more than 1.0 may also participate in the competition (e.g., three postdoctoral fellows with a workload of 0.4+0.3+0.3, or two postdoctoral fellows with a workload of 0.4+0.6).

The interest in the positions should be consulted at the UHK Faculty of Education with the Vice-Dean for Science, Research and Creative Activities at the UHK Faculty of Education (for those interested in the competition, see the Contact data).

The applicant must meet all the following general criteria:

- 1) The applicant must be a postdoctoral researcher according to the following definition: *“A postdoctoral researcher is a researcher within 7 years after obtaining the Ph.D. degree title or its foreign equivalent”*². If the applicant does

² The given period of time may be extended for the period of maternal and parental leave, long-term disease (lasting for more than 90 days), care for an ill family member (for more than 90 days), preparation for a specialist postgraduate examination, and military service.

not have the Ph.D. degree title, his/her title must correspond to ISCED Level 8 (International Standard Classification of Education).

- 2) The applicant has accomplished doctoral studies abroad or at any university in the Czech Republic except for the UHK. Inbreeding is not allowed.
- 3) The applicant must have very good knowledge of English.
- 4) The applicant must have a relevant publication activity. The results achieved within the last 5 years will be evaluated. The relevant publications are publications registered in the Thomson Reuters Web of Science database of the JCR index (type "article", "letter" and "review"). In the fields of the SSH disciplines, SJR SCOPUS index is relevant (type "article", "book", "book chapter", "letter" and "review") or field-relevant "book" or "book chapters".
- 5) Compliance of the applicant's research activity with a prospective research area at the UHK Faculty of Education (with a specific workplace – departments, laboratories, etc.).
- 6) The employment must last between 6 and 34 months. The employment can start from **1 March 2024** and must end no later than on **31 December 2026**.
- 7) The researcher must be at least a half-time employee of the UHK and his/her place of employment must be in the Czech Republic.

The Applicant shall submit the following documents:

- 1) Completed form – see Annex No. 1: Application Form for 2024-2026 Postdoctoral Job Positions at the University of Hradec Králové;
- 2) Diploma (and/or its recognition) – a simple copy;
- 3) Professional CV – **max. 2 pages**;
- 4) List of all achieved scientific results – **max. 2 pages**;
- 5) Project proposal, including the schedule of research work (a free form including a description of the plan of research activities and expected results; a Gantt diagram can be added) – **max. 2 pages**.
- 6) Email consent of a potential supervisor from the UHK Faculty of Education, that he/she agree to this role in the event of the selection of a postdoctoral fellow.

The estimated gross monthly wage with obligatory employer's and employee's deductions (taxes, social and health insurance) is 2,350 EUR (full-time

employment), the estimated gross monthly wage with obligatory employee's deductions is 1,725 EUR (full-time employment) and the estimated net monthly wage is 1,370 EUR (full-time employment).

Evaluation criteria of the quality and relevance

Two areas will be evaluated – the research purpose of the internship and the professional qualities of the candidate.

Research purpose of the internship

The relevance of the research plan, the obvious benefit for the UHK in terms of promised outputs, as well as the potential of establishing long-term cooperation with the researcher and its parent workplace will be evaluated. Direct compliance with the research areas of the UHK Faculty of Education and the promised preparation of joint research grants will be the advantage.

Professional qualities of the applicant:

- Number of articles indexed in JCR WoS, Articles in SJR SCOPUS, monographs and monograph chapters;
- Solution of research projects;
- Solution of projects with an international participation;
- Previous professional internships abroad.

Submission of applications

All the documents described above can be submitted by 21 January 2024. Please submit the application in an electronic form to Ing. Veronika Hružová (veronika.hruzova@uhk.cz).

Evaluation of applications

The Postdoctoral Selection Board members (at least 7 persons) are appointed by the Rector out of the representatives of the faculties and university management.

Contact data for those interested in the competition

Science and Knowledge Transfer Office of the UHK – Ing. Veronika Hružová,
coordinator of postdoctoral positions (veronika.hruzova@uhk.cz).

Faculty of Education – PhDr. Nella Mlsová, Ph.D., Vice-Dean for Science, Research
and Creative Activities (nella.mlsova@uhk.cz)

Definition of Types of Outputs

J – Peer-reviewed article

A peer-reviewed article in a scientific periodical is an original article and/or a review article published in a scientific periodical (journal) notwithstanding the publisher's country, presenting the original research outputs achieved by the author or a team that included the author. These are comprehensive texts featuring scientific works, organized as per the requirements of publisher(s) of the periodical in respect of the structure of scientific work (most frequently a summary, introduction, material and methods, outputs, discussion, conclusion, literature/sources overview) including the usual citation style, and an apparatus of footnotes, if any. These types of articles are usually placed in the group of original articles or reviews in such scientific periodicals.

A scientific periodical means a peer-reviewed, periodically published scientific journal with a scientific editorial board which is assigned the ISSN or e-ISSN code only, and is published in print-only, digital-only, or print-and-digital form, including an on-line release.

The articles in a scientific periodical are classified as follows:

- **Jimp** – original/review article in a scientific periodical which is included in the Web of Science database with the tag „Article“, „Review“, or „Letter“;
- **Jsc** – original/review article in a scientific periodical which is included in the Scopus database with the tag „Article“, „Review“, or „Letter“;
- **Jost** – original/review article in a scientific periodical which does not fit in any of the two foregoing groups, and which meets the general requirements for an article in a scientific periodical. The list of peer-reviewed non-impact scientific periodicals shall not be used.

The following are not considered to be scientific periodicals:

- Periodicals which do not have ISSN, nor e-ISSN assigned;
- Periodicals or extraordinary periodicals published under an ISSN and simultaneously under an ISBN in book form (this often occurs in case of conference papers that are registered in the WoS and Scopus databases. Outputs published in this type of source fall under type D outputs);
- Periodicals for which the method of reviewing contributions is not published and/or established;
- Daily or newspaper press and the like, i.e., regular daily press, focused “popular science” supplements to daily press, weekly newspapers, specialized newspapers;
- Non-fiction popular science periodicals intended for the general public, published by commercial publishers, public institutions, and others;
- Science-popularizing science periodicals intended for a broader professional public, e.g., published by professional societies, scientific institutions etc., in order to promote and popularize science;
- Periodicals of trade unions, political parties, associations etc.;
- Business and insurance periodicals;
- Standardised forms and newsletters;
- Special issues of journals in which texts of conference papers are published.

The following are not considered to be peer-reviewed articles:

- Reprints, abstracts, expanded abstracts (e.g., at conferences) etc., even if published in a specialised scientific periodical; articles of an informative or popularizing character on research outputs;
- Editorial materials, corrections, reviews, literature searches and summaries, even if published in a specialised scientific periodical;
- A preprint article, i.e. the version of the article published before the peer-review process;
- In case of articles under “Jost”, those ones comprising fewer than 2 pages of text, exclusive of photographs, charts, map exhibits, images, tables, and/or.

B – Monograph

A monograph presents the outputs of research which was carried out by the author of the book or by a team of authors that included the author. A monograph is a non-periodical scientific publication comprising at least 50 printed pages of the author's own text excluding exhibits such as photographs, graphics, maps etc., published in print or digitally, and reviewed by at least one broadly recognized expert in the respective field in the form of an expert review (such expert reviewer may not be from the author's institution). Such monograph deals with a well-defined problem in a particular scientific field, includes the formulation of an identifiable and scientifically recognized methodology (explicitly formulated methodological bases and/or formulation of a new methodology based on previous theoretical research in the field). The formal attributes of a monograph are references to literature in the text, a list of citations, and possibly also an apparatus of footnotes, a bibliography of sources, and a summary in at least one world language.

A monograph has an ISBN or ISMN assigned. The whole book is developed by a unified team of authors (regardless of each team member's share in the content), even if the individual chapters of the book were written by different/separate authors. Scientific books include monographs, scholarly encyclopaedias and lexicons, critical editions of sources, critical editions of art (music, art etc.), materials accompanied by studies, critical commented translations of demanding philosophical, historical, or philological texts accompanied by studies, critical translations accompanied by commentary of demanding philosophical, historical or philological texts, scientifically designed dictionaries and thesaurus- or encyclopaedia-type dictionaries in a given field, critical exhibition catalogues etc., as long as they meet the formal criteria set out above.

In case of a multi-volume scientific monograph, each volume may be recognized as an output if each volume alone meets the criteria and has been published as a separate publication with its own ISBN. If a monograph is recognized as type B output, its chapters may not be recognized as a type C output the same submitter.

The following are not considered to be monographs:

- Books that do not have an ISBN or ISMN assigned;
- Teaching texts (i.e. textbooks, coursebooks);
- Expert opinions and reports, studies, translations, manuals, information and promotional publications, yearbooks (except for those that meet the requirements of a monograph), annual or similar periodic reports;
- Common language dictionaries;
- Printed or digitally published research summaries, purpose-made summaries of specialist papers (e.g., within one institution);
- Printed or digitally published abstract summaries, or expanded abstracts, or oral communication from conferences;
- Methodological manuals, catalogues, and standards;
- Proceedings (individual contributions in the proceedings may be a type D output);
- Fiction, non-fiction, travelogues, texts of theatre plays;
- Selective bibliographies, annual reports, speeches, reports, collections of students' contest papers, tourist guides;
- Commercial translations from foreign languages;
- Memoirs, information materials, popularizing monographs, biographies, autobiographies, monographically issued final reports from grants or projects.

Monograph outputs are checked by a reference to the Digital Object Identifier (DOI) or Open Access (OA), traceability in an internationally recognized catalogue, or by a returnable borrowing from the reporting institution confirmed by the Provider.

C – Chapter in a monograph

A chapter in a monograph (if the book complies with the definition of type B output) may be acceptable if the entire book has one editor only, or in cases where the author is stated as a co-author (albeit with a minority share in the contents) of the entire book (on title page, on the back of title page), and is a member of the team of authors with clearly identified main authors. However, the chapter needs to have an individual author or team of authors.

If the monograph is classified as a type B output, its chapters cannot be included as a type C output for the same submitter.

D – Article in proceedings registered in the Scopus database or in the Web of Science Conference Proceedings Citation Index

An article in proceedings presents the original outputs of the research carried out by the author or the team that included the author. The article has a regular structure of scientific work including the citation style (it is neither an abstract nor an extended abstract), and is published in proceedings.

The proceedings are reviewed non-periodical publications, published on the occasion of a conference, seminar, or symposium. They contain separate articles by various authors that usually have a mutual element or share a related topic, and have an ISBN and/or ISSN assigned.

An “article in proceedings” type of output is a paper with a total range of at least 2 pages, excluding photos, graphs, map exhibits, pictures, tables, and advertisements.

An “article in proceedings” type of output is an article which is registered:

- In the Scopus database in sources (“Sources”) as a Book Series or Conference Proceedings, and has an ISBN and/or an ISSN assigned;
- In the Web of Science Conference Proceedings Citation Index database and has an ISBN and/or ISSN assigned;
- An article in a special issue of a journal registered in one of the above databases dedicated to the publication of conference papers.

The following texts are not considered to be articles in proceedings:

- Occasionally published summaries of scientific papers (e.g., within one institution, on the occasion of anniversaries, founding celebrations and/or annual conferences);
- Collected and/or published abstracts, or expanded abstracts;
- Articles assorted and published elsewhere etc.

Annexes:

- 1) Application Form for 2024-2026 Postdoctoral Job Positions at the University of Hradec Králové
- 2) Activity Report – Quarterly Progress Report Form for Postdoctoral Researcher Fellows Scheme

Final Provisions

This Decree becomes valid and effective on the day of its signature.

In Hradec Králové on 20 December 2023

Prof. Ing. Kamil Kuča, Ph.D.
